## OBJECTIVE

Computer Science postgraduate (M.Tech IT) with practical experience in mobile and full-stack development, including live production apps on the Google Play Store and App Store, and experience leading and guiding junior developers. Seeking a challenging role to apply skills in Flutter, Node.js, Python/Django and IoT to build impactful, scalable solutions while continuing to grow as an engineer.

## WORK EXPERIENCE

**Software Developer** — Quotus Software Solutions Pvt. Ltd. *Oct 2025 – Ongoing*

- Lead and mentor junior developers through task planning, code reviews and technical guidance to maintain code quality and on-time delivery.
- Built ASTRA, a recruitment platform for a Sri Lankan client, featuring role-based access for Recruiters, Hiring Managers, Admin and Management.
- Building Connectus, a professional networking mobile app for a Sri Lanka-based client, with user profiles, connections, a post/feed system, messaging, and job posting and job application features. Stack: Flutter, Node.js REST backend, PostgreSQL.
- Work with client-configured CI/CD pipelines as part of the build and release flow, and write unit tests for my applications to improve stability and maintainability.

**Trainee Software Developer** — Quotus Software Solutions Pvt. Ltd. *Sep 2024 – Sep 2025*

- Developed and deployed hotel booking applications (Alhajz, Woohootrip, 94Booking) for a Dubai-based hotel management client, live on Google Play Store and App Store.
- Developed a blockchain-integrated mobile gaming app in Flutter with MetaMask wallet connectivity, supporting deposits, withdrawals, currency conversion and transaction history tracking.

## PROJECTS

**IoT-Based Smart Mobility Dustbin — Wowie** | *Arduino (ESP32), Flutter, Node.js, MongoDB*
Designed a mobile, autonomous dustbin using ESP32-controlled locomotion with vacuum-based waste collection, gesture-controlled lid operation via infrared sensing and servo actuation, and ultrasonic sensors for obstacle detection and fill-level monitoring. Integrated Wi-Fi and Firebase Realtime Database for remote monitoring; validated with a working hardware prototype.

**Student Document Management Portal** | *Python, Django*
Built a student portal for centralized management of all student documentation, streamlining record-keeping and improving accessibility for students and administrators.

**Student Feedback System** | *PHP, MySQL*
Developed a system that lets students track and improve academic performance, while enabling teachers to assess and enhance teaching practices based on feedback.

## EDUCATION

**MTech in Information Technology** *2024 – 2026*
Utkal University, Vani Vihar, Bhubaneswar | CGPA: 9.09

**Master of Computer Applications (MCA)** *2022 – 2024*
GITA Autonomous College, Bhubaneswar | SGPA: 9.52

**Bachelor of Computer Application (BCA)** *2019 – 2022*
NIIS Group of Institutions, Bhubaneswar | CGPA: 8.9

**12th (Senior Secondary)** *2017 – 2019*
SVS Sr. Secondary School, Baripada | 59.2%

**10th** *2017*
SVS Residential School, Baripada | CGPA: 10

## TECHNICAL SKILLS

**Programming Languages:** Java, Python, C, C++ (Intermediate); PHP (Basics)

**Mobile Development:** Flutter

**Backend & Database:** Node.js, Django, MySQL, PostgreSQL, MongoDB, Firebase

**Full Stack Development:** MERN Stack (MongoDB, Express.js, React.js, Node.js)

**Practices:** Unit Testing, CI/CD, Git, Code Reviews, Mentoring

**IoT & Hardware:** Arduino, ESP32

## CERTIFICATIONS

- Introduction to Internet of Things — NPTEL
- Python Programming — Seeree, Bhubaneswar

## ADDITIONAL INFORMATION

**Soft Skills**
Leadership, Adaptability, Creativity, Teamwork

**Languages Known**
Odia, Hindi, English

**Achievements**
State-level certificate (Kabaddi), National-level certificate (Rugby)

**Hobbies & Interests**
Cooking, Photography, Reading
